

SALDATRICI A PUNTI  
**TRE CI**

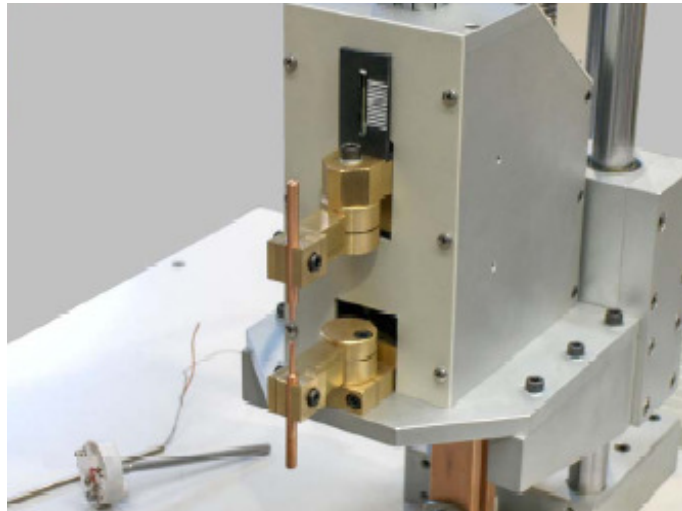

Bench micro spot welding machine, with PAT 1 head fed through a 3000 Amp inverter generator at 15 KHz, especially realised for the welding of temperature recording elements.

Via PASUBIO, 57 int. 2 - 20037 PADERNO DUGNANO - MI  
tel. (+39) 02/3511869 fax (+39) 02/33260329

The welding head is mounted on a lifting system, which consents the placing of elements with a length (height) up to 1200 mm under the electrodes.

The structure of the electrode slides allows quick switching of the same, which, along with its 20 welding programs, makes this machine very flexible.
