

## SALDATRICE SERIE TAC

SALDATRICI A PUNTI  
**TRE CI**

Welding head built to be mainly used in lines or automatic machines, but can be used as a bench single work station. It is usually assembled horizontally. The main characteristic is the fact that the electrodes are self-centering on the workpiece and this removes some defects due to a faulty position of the workpieces.

Disposal in A.C, single-phase and D.C Inverter three-phases.
